Type	Description
 Special Sessions	Include Award Lectures as well as symposia recommended by other oncology-related organizations (and developed in conjunction with ASCO), the Cancer Education Committee, the Scientific Program Committee, and the ASCO Board of Directors, as being of particular interest, importance, and relevance to Meeting attendees.
 Clinical Science Symposia	Formerly known as Integrated Education Sessions, these sessions provide a forum for science in oncology, combining the presentation of selected abstracts on a specific topic with didactic lectures. Experts in the field place the studies in the appropriate context based on the strength of the evidence and critically discuss the conclusions in terms of their applicability to clinical practice.
 Oral Abstract Presentation Sessions	Include didactic presentations of the abstracts determined by the Scientific Program Committee to be of the highest scientific merit. Experts in the field serve as Discussants to place the findings into perspective. The Plenary Session includes the abstracts selected by the Scientific Program Committee as having practice-changing findings.
 Poster Discussion Sessions	Highlight selected abstracts of clinical research in poster format. The posters are grouped by topic or by the questions posed as a result of the research findings. The posters are on display for a specified time, followed by a discussion session in which experts provide commentary on the research findings.
 General Poster Sessions	Include selected abstracts of clinical research in poster format. The posters are grouped by topic and are on display for a specified time.
